

Hacker Insurance

Are your clients protected?

For a quick analysis the following items should be reviewed. All the important items are not included in this list and each policy form should be carefully reviewed.

If CNN, Yahoo and Amazon.com (among others) can fall prey to the machinations of a computer hacker, then so can your clients. But, hackers don't just attack websites; security breaches can bring a growing business to its knees. Once security is breached, a business is at the mercy of the hacker, who can alter vital data, steal proprietary information or introduce a virus.

How can a company protect itself? With Unauthorized Access to Electronic Communications Systems (Hacker) Insurance coverage.
